### Activities Portal

Through a cloud-based online project management project acceleration tool, the company will be able to document their implementation progress while keeping focus and structure to the development of ideas for both, plant floor and new revenue growth opportunities. This online project accelerator will bring structure to the activities and documentation as the projects go through the stage gates of solutions as they materialize, be infused with customer input, discover which ideas fit within a Company's business strategies, go through streamlined development, and delivered to a waiting customer in a timeframe that is appropriate. This Private Company Portal is typically combined with Progress Meetings.

*Proper project management involves more than the ability to simply "get things done". It involves empowerment, delegation, and focused activities that maintains the goals and objectives of the project.*

### Benefits of Activities Portal

The Activities Portal helps with:

- Tracking and documenting activities throughout the facility;
- Holding project managers accountable for actions;
- Enable the tracking and delegation of duties;
- Maintaining momentum on projects;
- Prioritizing of projects;
- Identifying and managing problems and road blocks;
- Breaking-down "silos" within the organization;
- Documenting ALL activities with ROI; and
- Expediting the development of products/services/ideas bringing them to market quicker reducing development costs.
