VDA 6, Part 3:2016 – German Automotive Process Audit Standard

Learn from an Expert.

If your company is an automotive supplier to one of the German auto manufacturers, conducting internal audits in accordance with the VDA 6, Part 3 standard may be a requirement for you. And, while the standard is lengthy, AKA will take you through the process step by step and then integrate it into your current QMS, so you are conducting one internal audit that assesses both standards. Here's how.

AKA uses personnel who have previously worked with Mercedes Benz or BMW requirements, and know what the requirements are for German automotive suppliers. So, even if you are a new supplier to the industry, our experts know the standard and can apply it to your processes and practices. They also can tell you where you don't have to apply specific elements of the standard. Our goal is to provide you with an integrated internal audit program that works for your company, with only the documentation that you are required to do.

While the implementation effort is dependent upon the size of the company, the number of processes and product lines, management support, and even multiple manufacturing locations, implementing a compliant VDA 6, Part 3 German Automotive Process Audit Program will typically take 16 – 18 days done at your pace. Deliverables typically include assistance with:

1. Overview of VDA 6, Part 3 for your Management Team
2. Detailed training for internal auditors – 2 days
3. Development and integration of a VDA compliant audit check-list with your QMS.
4. Conducting a complete audit of your QMS
5. Audit Evaluation and Close-out
6. Assistance with resolving corrective actions
7. Achieve performance of 80% - Conditional Quality Capable Rating
8. Consultant off-site consultation – 2 days

Give us a call today and let us walk you through the process of implementing VDA 6, Part 3, the German Automotive Quality Management Process Audit Standard.
