Pre-Assessment of the VDA 6, Part 3 QMS (to determine compliance and readiness for certification)

This Pre-Assessment follows the guidelines found in the latest version of the German Automotive Process Audit Standard, VDA 6, Part 3:2016 and is intended to take place prior to the actual assessment by the Certification Body (CB). The objective is to determine the Company's compliance to the requirements found in the VDA 6, Part 3 Standard have been met and are effective, specifically that the company is performing its audits by process as required by the standard.

Objectives:

- Audit your Quality Management System in accordance with the requirements of the German VDA 6, Part 3 Standard.
- The objectives are:
 - To determine the Company's readiness for compliance and registration by determining if all of the requirements found in the VDA 6, Part 3 Standard have been met and are effective.
 - To ensure the company is performing audits by process as required by the standard.
- This audit is very similar to an actual compliance audit by a registrar.
- All findings will be reviewed and documented with a discussion of possible corrective actions.
- This audit can be used as part of the Company's current internal audit program.
