Patent Search Services

“How many ideas never get pursued because of the patent search hurdles?”

This activity is designed to help groups and individuals in researching their ideas and inventions.

It is intended to determine if an invention is already under patent, and if not, does the idea provide significant use or value and does it differ enough from other previously patented ideas. In other words, is it patentable and patent worthy?

The activity provides quick, expert advice on the most critical questions.

Upon completion of the workshop an operator will:

- Know of any patents or patents pending with the same title
- Know of any significantly similar patents or patents pending
- Have cross references to any related applications
- Have a documented background of the invention
- Receive verification as to whether the invention meets patent requirements
- Receive a recommendation for type of patent to pursue
- Have a list of known barriers to obtaining the patent
- Be aware of any patents pending

Benefits of the Service:

- Expense savings if the idea is already patented or has a patent pending
- Avoid Issues of name or trademark infringement
- Expedited patent processing with all documentation submitted up front
