

# Lean Six Sigma Kaizen

Services	Delivera
• Lean Six Sigma Kaizen Event	▪ 8 Hour event for 4-6 participants

## Lean Six Sigma Kaizen

Kaizen is an intensive focused approach to Process Improvement. Kaizen means to change for the better or “continuous improvement”. This continuous improvement methodology combines Lean Six Sigma project support (utilizing tools within the DMAIC process) and the team approach to problem solving. AKA’s Team will work with the Belt candidates or teams, to assure correct use of tools, correct interpretation of available data, and toll gate completion, which allows our client to make improvements to a specific product or portion of your processes.

*“Implementing change for the good”*

Prior to the Kaizen Event The AKA Team will work with the Company to identify projects and opportunities for Lean Six Sigma Kaizen event(s) and organize each event (to support a particular project or team, as appropriate).

During a Kaizen, individuals and work groups will generate improvement ideas, test hypotheses, and document/implement changes to the manufacturing process or support department. The results of the Kaizens are focused to support the project within the one to five (5) dayevent.

### Benefits of the Kaizen are:

- Professional project support
- One-on-one work with belt candidates or team support and coaching
- Visual, action orientation
- Verified understanding of DMAIC concepts and tool usage
- Fosters communications
- People think from a business perspective

The Company will provide the classroom and refreshments for participants and trainer.
