NATIONAL RESOURCE CENTER FOR HEALTH AND SAFETY IN CHILD CARE AND EARLY EDUCATION COVID-19 Questions-CFOC Crosswalk

As of April 13, 2020

This CFOC Crosswalk is designed to provide information to help caregivers/teachers and child care health consultants provide safe and healthy early care and education environments during the COVID-19 pandemic. Just click on the links in the document below to learn how the CFOC standards address common questions and issues during this time. While many standards fully address the questions there are others that need supplementary information to fully provide a healthy and safe environment. Supplemental information can be found at [CDC](#) and [Child Care Aware of America](#) as well as your specific state and local resources, e.g. public health, child care licensing, and child care resource and referral.
